1 Introduction

- **Name project:** Badminton Store Web
- **Idea:**
 - In recent years, the growing popularity of badminton and the increasing demand for sports equipment have created a great opportunity for selling badminton gear online. At the same time, the rising trend of online shopping makes it easier for customers to browse and purchase suitable products without the need to visit physical stores. Therefore, building a website dedicated to selling badminton equipment is a promising direction, offering greater access to customers and improving business efficiency.
 - The website is developed based on the existing VNB Shop platform and is modeled after the management system of Shopee, but adjusted to fit the scope of this project. Instead of the three roles found on Shopee (admin, seller, buyer), this website will feature three main roles: admin, branch (distributors or partner stores), and buyer. Due to time constraints, the team will only be able to develop a limited version with core functionalities, focusing on delivering an effective online shopping experience and efficient product management.

2 Target user & Environment

2.1 Target users

- **Customers:** Anyone of any age, at any time, who wants to browse and purchase badminton-related products.
- **Branch Managers:** Manage the inventory and sales of their respective branches. Their role is focused on operational and commercial tasks within a specific location.
- **Administrators:** Oversee and enforce the platform's terms and policies, ensure a safe and trustworthy environment for all users.

2.2 Environment

- **Devices:** The system supports access via personal computers and laptops only. The website is optimized for the following operating systems: Windows, macOS, Linux.
- **Web Browsers:** Recommended minimum browser versions:
 - Google Chrome: version 90+
 - Mozilla Firefox: version 88+
 - Microsoft Edge: version 90+
 - Opera: version 75+
 - Safari: version 14+

3 Key features

Key Feature	Description	Type of User
Login/ sign in	Users log in to access and manage their account; log out when done	All Users (Admin, BM, Customer)
Product Search & Filter	Search and filter products by category, price, and brand	Customer
Product Management	Edit product details, check and manage inventory	Admin, Branch Manager
Cart & Order Management	Add to cart, place orders, track order status	Customer, Branch Manager
Payment Processing	Update order status after successful payment	System (automated), BM
Returns & Exchanges	Request return/exchange; BM handles, Admin approves major cases	Customer, Branch Manager, Admin
Product Review	Submit reviews for purchased products	Customer
Account Management	Admin manages accounts; BM manages their branch; Customers register, order, review	Admin, Branch Manager, Customer
Promotions & Discounts	BM creates promotions; customers apply during checkout	Branch Manager, Customer
Notifications	Notify customers about orders; BM about new products; report to Admin	Customer, Branch Manager, Admin
Reports	BM generates branch reports; Admin views system-wide reports	Branch Manager, Admin
